WELCOME

Thank you for purchasing the mophie powerstation external battery. Your powerstation battery is a compact yet powerful mobile charging solution for any tablet, smartphone or other USB device.

PACKAGE CONTAINS

- mophie powerstation 5X or powerstation 8X External Battery
- Micro USB Cable
- Quick-Start Guide

FEATURES

Your mophie powerstation external battery extends the battery life of your smartphone, tablet or other USB device for hours with more power to rock, talk, surf and send. Power through a full day with ease.

Here are just some of the reasons why your powerstation external battery is so great:

- High-density, high-output external batteries that charge at super-fast speeds—up to 2.4 amps!
- Compatible with tablets, smartphones and other USB devices.
- Anodized aluminum case for enhanced durability, an elegant look and a premium feel.
- Dual USB output ports let you charge two devices at the same time.
- 15W Fast Charge provides high-speed input and output charging.
- *Bluetooth*® monitoring lets you use the free mophie Power app to manage the battery life of your powerstation battery and a paired device.
- Priority+ pass-through charging enables pass-through charge and sync when connected to a computer. Your connected device recharges first, then the powerstation battery recharges.
- Simply connect the powerstation battery to your device to begin charging.
- Keep tabs on current battery life at a glance with the integrated four-light LED status indicator. Know before you go!
- Rechargeable for over 500 full cycles. Our battery is built to last, letting you do more, longer.
- mophie's smart adaptive charging technology identifies your connected device and always delivers the fastest, most efficient charging speeds available.
- Digital Power Management circuitry provides built-in short-circuit, overcharge and temperature protection. Safety First!

COMPATIBILITY

mophie powerstation 5X and powerstation 8X external batteries have been designed to charge tablets, smartphones and other USB devices, and are powerful enough to simultaneously charge two tablets.

- If you experience any issues with charging your particular device, ensure that the powerstation battery is fully charged and check the FAQ section on this website.

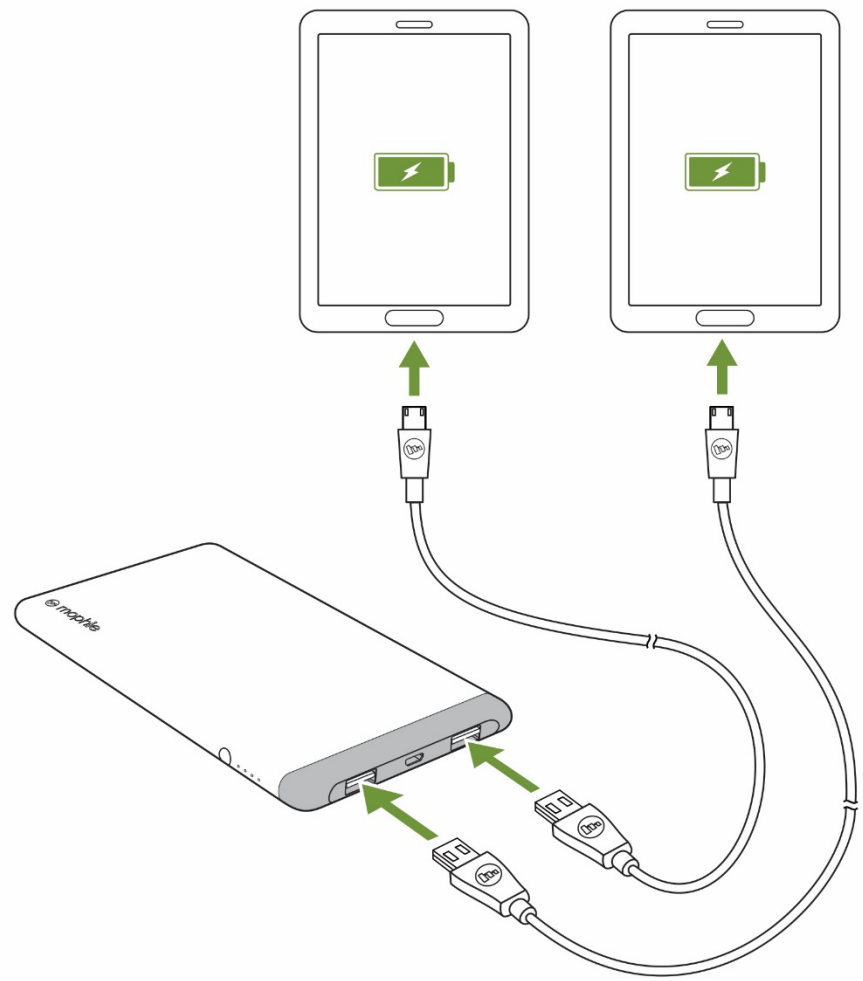
As always, no matter what device you have, before using your powerstation battery you should carefully read through the *Warning* section in this user manual and in the included quick-start guide.

The mophie Power app is available in iOS and Android versions.

CHARGING YOUR DEVICE USING YOUR POWERSTATION BATTERY

Connect the supplied USB cable (or the cable that came with your device) to your device and to one of the USB ports on the powerstation battery. The powerstation battery will immediately begin charging your device. You can charge two devices at the same time.

[Insert illustration: "PS 5X_8X OM_Pic 1_100115.ai"]



15W Fast Charge Capability

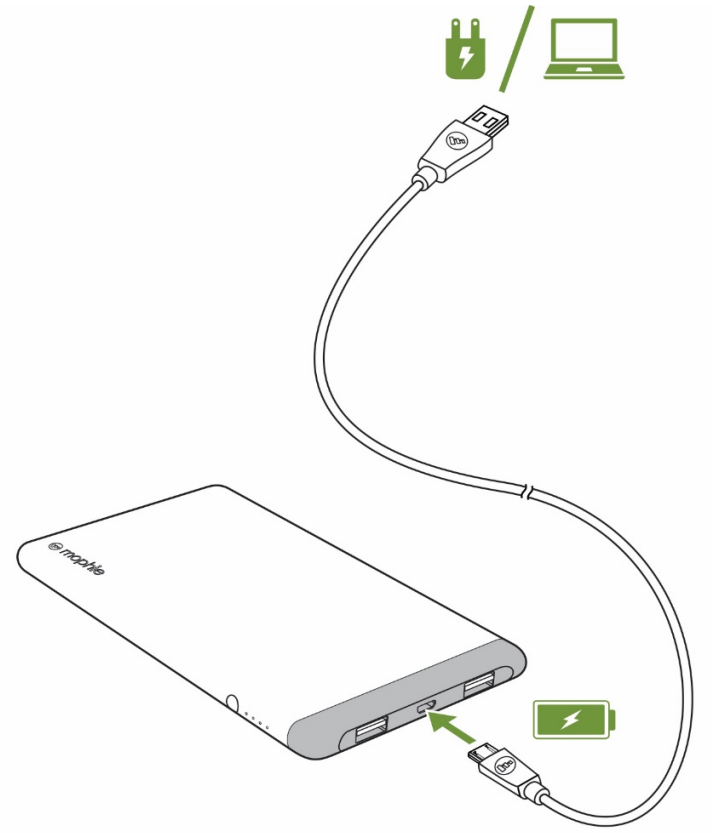
The powerstation 5X and powerstation 8X batteries have 15W Fast Charge capability, which provides high-speed output charging on the USB port marked with the 15W Fast Charge icon:

[Insert illustration: "15W Fast Charge Icon.ai"]

RECHARGING YOUR POWERSTATION BATTERY

Your powerstation battery comes charged and ready to go. When it does need recharging, use the supplied micro USB cable to connect its micro USB port to your computer or any power source with a USB out, like the USB wall adapter included with your device.

[Insert illustration: "PS 5X_8X OM_Pic 2_100115.ai"]



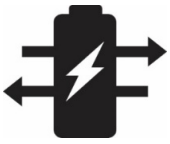
The powerstation 5X and powerstation 8X batteries have 15W Fast Charge input charging capability when you recharge them using the mophie USB Wall Charger with 15W Fast Charge capability.

Priority+ pass-through charging

The powerstation 5X and powerstation 8X batteries have pass-through charging, which enables pass-through charge and sync when the powerstation battery is recharging from a computer. Your connected device recharges first, then the powerstation battery recharges.

Connect your device to the powerstation battery USB port that is marked with the Priority+ charging icon:

[Insert illustration: "Pass-Through Charging Icon_POS.eps"]



Although the powerstation 5X and powerstation 8X batteries can charge two devices simultaneously, they can only charge one device while they are being recharged. Connect the device to the powerstation USB

port that is marked with the Priority+ charging icon. (The other USB port is shut off while the powerstation battery is being recharged.)

CHECKING YOUR POWERSTATION BATTERY'S CHARGING STATUS

Press the status button on your powerstation battery and the status LEDs will indicate its charge level. Four LEDs means that the powerstation battery is fully charged, while one LED means that it's almost empty. Know before you go!

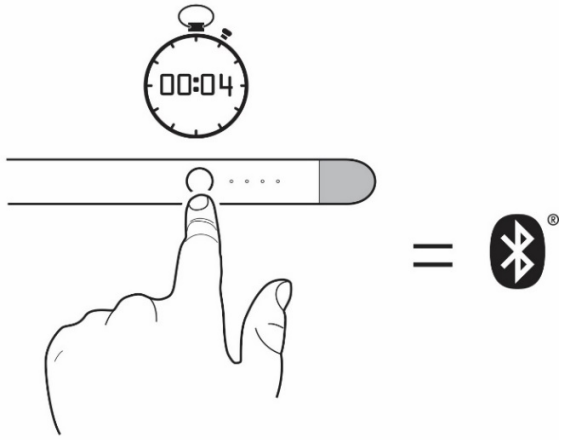
BLUETOOTH® PAIRING

The powerstation 5X and powerstation 8X batteries feature *Bluetooth®* Low Energy (BLE), and can be paired with a mobile device that has the free mophie Power app installed. The mophie Power app lets you manage the battery life of your powerstation and the paired device.

To pair the powerstation battery with your mobile device:

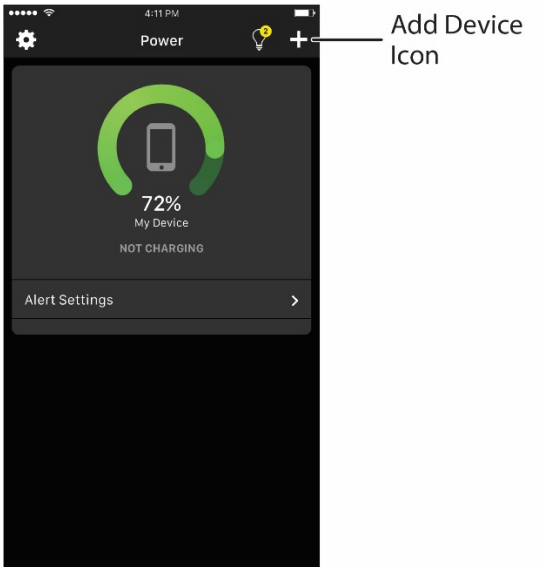
1. Install the free mophie Power app on your mobile device. It is available at the App Store (iOS devices) and at Google Play (Android devices).
2. Make sure your device's *Bluetooth®* is turned on.
3. Press-and-hold the powerstation battery's status button for four (4) seconds. The status LEDs will flash in sequence from left-to-right and right-to-left, indicating that the powerstation battery is in the pairing mode.

[Insert illustration: "PS 5X_8X OM_Pic 4_100215.ai"]



4. Launch the mophie Power app on your device. The home screen will appear:

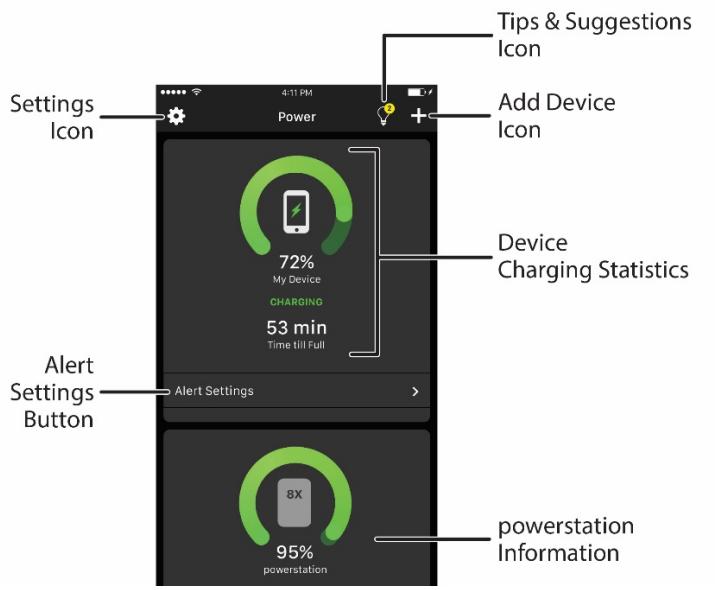
[Insert illustration: "Add Device_1.ai"]



5. Tap the Add Device icon. A list of nearby *Bluetooth*® devices will appear. Select "powerstation 5X" or "powerstation 8X" from the list and tap "Pair" on the pop-up screen.
6. The Registration page will appear. You can either register your powerstation battery at this time or tap "Skip" to register it later.
7. The Confirmation screen will appear—tap "Done." The powerstation battery is now paired with the device and its charging statistics appear on the Power app home screen along with those of the device (see *Using the mophie Power app,* below).

USING THE MOPHIE POWER APP

[Insert illustration: "Home Screen_1.ai"]



Device Charging Statistics: Shows the device battery's charge level, its status (charging/not charging) and if charging, the time until it is fully charged.

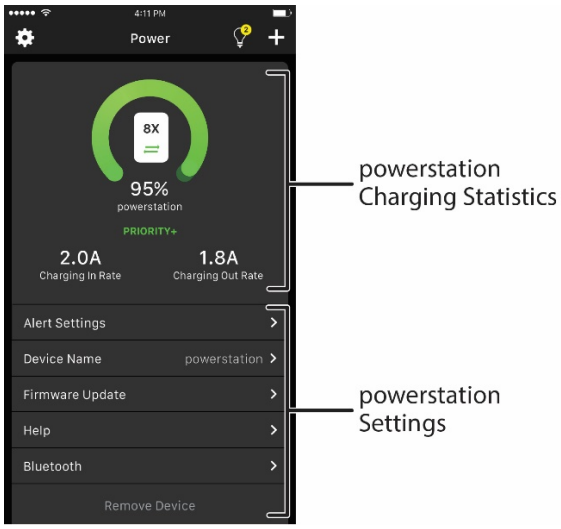
Tips & Suggestions: Tap on the icon to see tips and suggestions that help improve battery life and get the most out of your phone. The app automatically downloads new tips and suggestions when they become available.

Settings: Accesses the app settings menu.

Alert Settings: Lets you create customized device battery percentage notifications or to be notified when your device has finished charging.

powerstation Information: Swipe up or tap on the screen to reveal all of the powerstation Charging Statistics and settings.

[Insert illustration: "PS Screen_1.ai"]



powerstation Charging Statistics: The charging statistics the App displays depend on whether the powerstation battery is not charging (Connected), is charging the device (Charging Out), is being recharged (Charging In) or is charging the device at the same time it is being recharged (Priority+):

[Insert illustration: "PS Charging States.ai"]

powerstation Settings:

- Alert Settings: Lets you create customized powerstation battery percentage notifications or to be notified when the powerstation battery is low or has finished charging.
- Device Name: Lets you create a unique name for your powerstation battery.
- Firmware Update: Lets you update the powerstation battery to the latest firmware version.
- Help: Displays this user manual on your device.
- Bluetooth: Lets you place the powerstation battery in AirPlane Mode, turning off *Bluetooth*®. The powerstation's battery percentage at the time it was un-paired from the device as well as the time the powerstation battery was un-paired are displayed.
- Remove Device: Cancels the *Bluetooth*® pairing between the powerstation battery and your device and removes powerstation information from the app screen.

TAKING CARE OF YOUR POWERSTATION BATTERY

- Keep your powerstation battery dry and away from moisture and corrosive materials.
- Do not clean your powerstation battery with harsh chemicals, soaps or detergents. Just wipe the case with a soft, water-dampened cloth.
- Recharge your powerstation battery once every three months when not in use. If you plan on putting it away, charge it for one hour first.

WARRANTY

At mophie, we are dedicated to making the best quality products we can. To back this up, this product is warranted for 1 full year from date of purchase. This warranty does not affect any statutory rights that you may be entitled to. Keep a copy of your purchase receipt as proof of purchase. Be sure to register your product at mophie.com. Failure to register your product and/or provide proof of purchase may void the warranty.

Exclusions & Limitations

Except for the limited warranty expressly set forth or to the extent restricted or prohibited by applicable law, mophie expressly disclaims any and all other warranties express or implied, including any warranty of quality, merchantability, or fitness for a particular purpose, and you specifically agree that mophie shall not be liable for any special, incidental, indirect, punitive, or consequential damages for breach of any warranty of any type on any mophie product. In addition to and without limiting the generality of the foregoing disclaimers, the limited warranty does not, under any circumstances, cover the replacement or cost of any electronic device or personal property inside or outside of the mophie product.

WARNING

Read all instructions and warnings prior to using this product. Improper use of this product may result in product damage, excess heat, toxic fumes, fire or explosion, for which damages you (“Purchaser”), and not mophie llc (“Manufacturer”) are responsible.

- Do not store device in high-temperature environment, including heat caused by intense sunlight or other forms of heat. Do not place device in fire or other excessively hot environments.
- Be cautious of excessive drops, bumps, abrasions, or other impacts to this device. If there is any damage to the device such as dents, punctures, tears, deformities, or corrosion due to any cause, discontinue use. Contact Manufacturer or dispose of it in an appropriate manner at your local battery-recycling center.
- The powerstation battery should be operated only in open-air conditions. It should not be operated in an enclosed, unventilated space such as a carrying bag, pocket or purse. Failure to follow these instructions may cause damage to the powerstation battery by overheating.
- Do not disassemble this device or attempt to re-purpose or modify it in any manner.
- Do not attempt to charge this device using any method, apparatus, or connection other than the device’s USB connector. For questions or instructions for the various ways to charge the device refer to the *Recharging your powerstation battery* section of this manual.

- Do not attempt to replace any part of this device.
- If this device is intended by Purchaser to be used by a minor, purchasing adult agrees to provide detailed instructions and warnings to any minor prior to use. Failure to do so is sole responsibility of purchaser, who agrees to indemnify Manufacturer for any unintended use/misuse by a minor.
- All products have gone through a thorough quality assurance inspection. If you find that your device is excessively hot, is emitting odor, is deformed, abraded, cut or is experiencing or demonstrating an abnormal phenomenon, immediately stop all product use and contact Manufacturer.
- Before storing your battery for an extended period of time, charge it for one hour.
- Never dispose of batteries in the garbage. Disposal of batteries in the garbage is unlawful under state and federal environmental laws and regulations. Always take used batteries to your local battery-recycling center.
- This product contains chemicals known to the state of California to cause cancer and birth defects or other reproductive harm.

LEGAL

This product is meant for use only in conjunction with the appropriate device. Please consult your device packaging to determine whether this product is compatible with your particular device. Manufacturer is not responsible for any damages to any device incurred through the use of this product.

Manufacturer shall not in any way be liable to you or to any third party for any damages you or any third party may suffer as a result of use, intended or unintended, or misuse of this product in conjunction with any device or accessory other than the appropriate device for which this product is designed. Manufacturer will not be responsible for any damages you or any third party may suffer as a result of misuse of this product as outlined above. If you are responsible for product use with an unintended device and damages result from such use, you agree to indemnify Manufacturer for any resulting injuries to any third part(ies).

This device complies with part 15 of the FCC Rules and RSS-Gen of IC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced technician for help.

CAUTION: To comply with the limits of the Class B digital device, pursuant to Part 15 of the FCC Rules, this device must be used with certified peripherals and shielded cables. All peripherals must be shielded and grounded. Operation with non-certified peripherals or non-shielded cables may result in interference to radio or reception.

MODIFICATION: Any changes or modifications of this device could void the warranty.
